SUMMARY

Computer science-focused B.Tech student (AI & Data Science, CGPA 8.05/10) who builds and ships end-to-end software. Strong foundation in data structures, algorithms and object-oriented design with hands-on experience in C++, Python and TypeScript. Builds full-stack and Generative AI applications using RAG, Qdrant, cloud deployment and management, databases and AWS. **Passionate about solving real-world problems through software, with a focus on writing clean, reliable and scalable code.**

EDUCATION

Sanjay Ghodawat University, Kolhapur, India

2025 – 2029

B.Tech – Artificial Intelligence & Data Science | CGPA: 8.05 / 10

Expected Graduation: 2029

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Web Development, Artificial Intelligence, Machine Learning, Data Science

TECHNICAL SKILLS

Languages:	C++, Python, JavaScript, TypeScript, SQL
CS Fundamentals:	Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, Debugging
AI / ML:	Generative AI, LLM Applications, RAG, Embeddings, Semantic Search, AI Agents, Prompt Engineering, NLP
AI Tools & Frameworks:	LangChain, Qdrant, Ollama, LLM APIs, Vector Search
Backend & Databases:	Node.js, REST APIs, MongoDB, SQL, Database Management
Frontend:	React.js, JavaScript, TypeScript, HTML, CSS, Vite
Cloud & Tools:	AWS, Vercel, Cloud Deployment & Management, Git, GitHub, VS Code

EXPERIENCE

Web & App Developer Intern – Antmark

Aug 2026 – Present

- Working primarily on **iOS and Android mobile application development** for client and internal products.
- Contributing to the development and improvement of **mobile application features and user experiences**.
- Working with modern web and mobile technologies to build, test and refine application functionality.
- Gaining hands-on experience with **real-world product development, debugging and deployment workflows**.

PROJECTS

Vaani – Voice RAG

Python | RAG | Qdrant | Ollama | Speech-to-Text | Vercel

- Built a voice-enabled **Retrieval-Augmented Generation** application for document-based question answering.
- Implemented speech-to-text input, document retrieval and LLM-based response generation.
- Used **Qdrant vector search** for semantic retrieval and grounded responses.
- Integrated citations and guardrails to improve response reliability and reduce unsupported answers.
- Deployed the application through **Vercel**.

Live: <https://vaani-voice-rag.vercel.app/>

PhotoProof – Offline-First Field Documentation App

React Native | Expo | TypeScript | SQLite

- Built an offline-first mobile application for capturing **GPS-tagged photos and project data** for field teams.
- Implemented **SQLite-based local storage** to preserve records without network connectivity.
- Integrated reverse-geocoding APIs to associate captured evidence with location information.
- Added automated report generation to convert field data and photo evidence into structured records.

Sentient OS Clone

TypeScript | React | Interactive UI | 3D Web

- Developed an interactive recreation of the Sentient OS interface using modern web technologies.
- Built a **3D MacBook environment** with interactive animations and UI interactions.
- Implemented neural-network visualization and dynamic interface components.
- Focused on responsive design, performance and immersive user experience.

Live: <https://sentient-clone.vercel.app/>

GetChasma

JavaScript | Web Development | E-Commerce | 3D UI

- Built an interactive optical e-commerce platform focused on modern product discovery and shopping experience.
- Developed interactive eyewear and lens visualization features.
- Implemented customer order and return workflows along with an administrative interface.
- Designed the platform with a focus on usability, responsive UI and product interaction.

ACHIEVEMENTS

- Finalist – Makers Conclave 2026**, NIAT flagship innovation showcase.
